PROFESSIONAL SUMMARY

AWS Certified Solutions Architect – Associate with hands-on experience provisioning, securing, and supporting AWS infrastructure, including EC2, VPC, S3, EBS, AMI, and IAM, in a remote, cross-functional engineering environment. Completed hands-on projects in CI/CD automation with GitHub Actions, Docker, and Amazon ECR, and in VPC and load-balanced architecture design on AWS. Experienced in cloud network and security hardening, IAM administration, cloud migration planning, and technical documentation, and in working directly with developers, DevOps engineers, and security teams. Clear communicator for both technical and non-technical stakeholders. Seeking to apply AWS infrastructure, security, and CI/CD experience to a DevOps engineering role in a technology or financial environment.

SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, S3, EBS, AMI, IAM, Application Load Balancer, Systems Manager Session Manager, AWS Budgets) | Infrastructure Provisioning | Cloud Migration & Adoption | Cloud Architecture | Cloud Cost & Performance Optimization

DevOps & CI/CD: GitHub Actions | CI/CD Pipelines | Docker | Amazon ECR | GitHub Container Registry | Git & GitHub | Automated Testing | Deployment Automation | OIDC Authentication to AWS

Networking & Security: VPC & Subnet Networking | Network Security | IAM & Least-Privilege Access | Identity & Access Management | Cryptography & Key Management | Security & Compliance | Cloud Account Hardening

Collaboration & Communication: Cross-Functional Collaboration | Remote Teamwork | Stakeholder Communication | Technical Documentation | Requirements Gathering | Project Management

PROFESSIONAL EXPERIENCE

Solutions Architect | McOham Engineering (Remote) July 2025 – Present

- Provision and manage AWS infrastructure, including EC2, VPC, EBS, AMI, S3, and subnets, along with assigned operational tasks.
- Configure, deploy, support, and harden AWS cloud services, including AWS root-account security controls.
- Administer AWS Identity and Access Management (IAM), including enterprise-level users, groups, roles, and policies.
- Collaborate remotely with developers, DevOps engineers, and security teams to align cloud implementations with project requirements.
- Design and implement cloud-based solutions aligned with business requirements, technical objectives, security policies, and industry best practices.
- Develop architecture frameworks, cloud adoption strategies, and migration roadmaps to support long-term cloud transformation.
- Support security and compliance initiatives covering application security, data protection, cryptography, key management, IAM, and network security across SaaS, IaaS, and PaaS environments.
- Assess, implement, optimize, and document security technologies and cloud processes.
- Translate complex technical requirements into clear communication for internal and external stakeholders with varying levels of technical expertise.

Sales Representative | IDO Enterprises, Abuja, F.C.T. January 2014 – December 2018

- Developed and drove sales activities to support revenue targets.
- Maintained accurate and organized records, documentation, and business information.
- Provided professional customer service and supported positive client experiences.

PROJECTS

Containerized AWS CI/CD Pipeline (Personal Project) GitHub | CI/CD Run

- Built and verified a GitHub Actions CI/CD pipeline for a Node.js/Express application that installs dependencies, runs three automated tests, and builds a Docker image.
- Published latest and commit-SHA image tags to GitHub Container Registry and a private Amazon ECR repository.

- Configured GitHub Actions to authenticate to AWS using OIDC and a least-privilege IAM role, eliminating long-lived AWS access keys.

AWS Three-Tier Architecture Foundation (Personal Project) GitHub | Architecture Diagram

- Designed a six-subnet VPC across two Availability Zones and deployed an EC2-hosted HTTP test application managed with systemd and AWS Systems Manager Session Manager.
- Validated public access and temporary Application Load Balancer routing, investigated target health, and removed the ALB after testing to control costs, using AWS Budgets for cost monitoring.
- Documented the architecture with a diagram and repository documentation.

EDUCATION

Bachelor of Engineering (B.Eng.), Chemical Engineering March 2019 – January 2024

Federal University of Technology, Minna (FUT Minna) | Minna, Niger State

Associate of Science (AS), Business Administration September 2022 – September 2026

University of the People | Pasadena, CA

VOLUNTEER & LEADERSHIP EXPERIENCE

Head of Broadcasting | OBS 52.5FM – NYSC Orientation Camp, Lagos State September 2025 – October 2025

- Led and coordinated on-air personalities and sound engineers, delegated responsibilities, and maintained professional broadcast standards.
- Managed communication between the Orientation Broadcasting Service (OBS) and camp officials, supporting accurate dissemination of official information to more than 2,000 corps members.
- Supervised daily broadcasting operations, ensuring timely announcements and reliable technical delivery.

Radio Presenter | Search FM 92.3, Niger State, Nigeria February 2021 – 2024

- Coordinated remote broadcasts for special events, including technical equipment and event logistics.
- Conducted data analysis for on-air programs and collaborated with other departments to align programming and station goals.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate | June 2025
- AWS Certified Cloud Practitioner | September 2023
- Jobberman Soft-Skills Training | September 2022
